BULGARIAN NATIONAL REVIVAL NEWSPAPERS. ABOUT THE BEGINNING OF THE BULGARIAN AND GABROVO INDUSTRY

Irena Uzunova

Bulgarian Revival Press gives a rich source material about the changes in society. The newspapers „Pravo“, „Turkey“, „Stupan“, „Zornitsa“, „Dunav“, „Macedonia“ and „Nezavisimost“ discuss the problems of pre-liberation developing of Bulgarian and Gabrovo economy. The union of country and industry is a guarantee for changes in economic development of nation, in spite of the fact that Bulgarians are dependent on Turkish Empire. Nevertheless, they managed to overcome the difficulties and Gabrovo people find their deserving place in one of the leading industries - textile. The Revival Press managed to reflect objectively the problems on the way to success, no matter what kind of political interests it defends. Economic priorities and interests in the society naturally regulate market mechanisms, demanding European quality from Bulgarian goods. The result could be real if the native buyer's mind changes too. The Bulgarian Revival Press takes up with this difficult task and it reflects not only the changes, but criticizes our compatriots as well, in the name of better future.
